

ABC PEST CONTROL Ltd.

Cockroach spray treatment prep sheet

- This product is a crack and crevice residual spray.
- Clean all surfaces before treatment.
- All foodstuffs should be removed from affected areas.
- In bathroom, remove toothbrush, toothpaste and similar items as well as towels/linens and any personal grooming items.
- Any pets (even ones in tanks) should be relocated away from the affected areas. All living things should stay out of the property being treated until product is completely dry, usually around 4 hours or as guided by the technician.
- Affected areas should be clutter free, so furniture can be moved as needed during treatment.
- Our products have a residual effect, please do not clean affected areas until the area is pest-free. This means don't wash the area where product would have been applied, but do keep the area tidy and free of garbage, crumbs, and debris.
- If you believe you have come into contact with product, wash affected with soap and water immediately.
- This product requires proper ventilation, please ensure our techs have access so they can open windows/doors as needed.
- Re-entry into premises is allowed only 6 hours post treatment.
